

Summary of Pastoral Council Meeting on September 14, 2026

The focus of the Pastoral Council meeting held on September 14 was on improving our security and addressing parking issues. It was decided to move forward now on improving the security system on the grounds. We will be adopting a new security system. But before that happens, new locks will be installed on church doors and the Rectory. Replacing locks every 7 years is a standard business policy. As our new protocols and changes come into play, parishioners will be informed, so they are aware.
